# IT solutions for a digital era.

## IT Integration & New Construction

Healthcare construction projects require careful coordination with a variety of disciplines. We engage early and often in the design phase as the infrastructure and technology consultant to the design professionals. Later in the implementation and commissioning phases, we educate and direct the trades to avoid conflicts and rework that might otherwise impact the budget and the target occupancy date.

### ABOUT SERVICE

#### CONSULTATION

We provide technology standards and workflow assessments to optimize efficiency, functionality, and productivity.

#### PMO

We customize a program to the specific healthcare environment and, then manage to specifications and transparently report on project health.

#### PROJECT DELIVERY

Our technology experts are in the field for continual monitoring of site conditions. This results in reduced risk exposure and allows our client to focus on core competencies instead of constant budget or schedule threats.

## A VALUE-ADDED TURNKEY SOLUTION

- ✓ An extension of your IT team from start to finish.
- ✓ Management of hardware logistics, inventory tracking, and technology staging.
- ✓ Daily communication and coordination with IT POC, construction project management, design professionals, low voltage vendors, medical vendors, medical leadership staff, and other vendors/partners.
- ✓ Daily touchpoint reports with recommended solutions to overcome construction impacting delays; weekly status reports with pictures; OAC meeting attendance to provide updates and direction to trades.
- ✓ Documentation of port and network data, inventory tracking, and technology deployment as-builts.
- ✓ Deployment, patching, and validation of network equipment, end user technology devices, media walls and players, TVs, telephony, wireless, WOWs, and other healthcare IT patient and staff devices.
- ✓ Base configurations, image updates, and labeling of end user devices.
- ✓ Day 1 Support.

Your team's focus should be on operations and supporting IT projects in your current healthcare environments. As a reliable extension of your team, we are an advocate for your needs throughout the construction process!
